methods

Contents of Volume 28

No. 1

Information for Contributors v

Minireview

R.W. Hendler and R.I. Shrager (USA)
Deconvolutions based on singular value decomposition and the pseudoinverse: a guide for beginners 1

Research Articles

A. Bianchi, E. Giachetti and P. Vanni (Italy)
A continuous spectrophotometric assay for alkaline phosphatase with glycerophosphate as substrate 35

B. Bendixen and D. Rickwood (UK)
Properties and applications of a new type of iodinated gradient medium 43

A. Andreoni, A. Colasanti, A. Kisslinger, M. Mastrocinque, P. Riccio and G. Roberti (Italy)
Fluorometric determination of the kinetics of anthracyclines uptake by cells 53

G.B. Proctor and K.-M. Chan (UK)
A fluorometric assay of peroxidase activity utilizing 2′,7′-dichlorofluorescein with thiocyanate: application to the study of salivary secretion 69

Short Note

H.J. Ellis, A.P. Doyle, H. Wieser, R.P. Sturgess, P. Day and P.J. Ciclitira (UK, Germany)
Measurement of gluten using a monoclonal antibody to a sequenced peptide of α-gliadin from the coeliac-activating domain I 77

Corrigendum 83

No. 2

Announcement iii

Research Articles

P. Bäckman, M. Bastos, D. Hallén, P. Lönnbro and I. Wadsö (Sweden)
Heat conduction calorimeters: time constants, sensitivity and fast titration experiments 85

Y. Durocher and S. Chevalier (Canada)
Detection of phosphotyrosine in glutaraldehyde-crosslinked and alkali-treated phosphoproteins following their partial acid hydrolysis in gels 101

I. Syrový (Czech Republic)
Glycation of albumin: reaction with glucose, fructose, galactose, ribose or glyceraldehyde measured using four methods 115

A. Rescigno, A.C. Rinaldi, N. Curreli, A. Olianas and E. Sanjust (Italy)
A dyed substrate for the assay of endo-1,4-β-glucanases 123

I. Šafařík and M. Šafaříková (Czech Republic)
Spectrophotometric determination of effective proteolytic activity in biodetergents 131

Y. Zhou, S.D. Worley and A.J. Illies (USA)
Interaction of methyl benzoate as a model odorant with a series of free-base amino acids and some amino-acid hydrochlorides 137

A. Kozik (Poland)
Competitive protein-binding radioassay of thiamine in selected biological materials 147

Short Note
L.-H. Ro, R.-J. Chen and D. Shiuan (Taiwan)
Rapid purification of antiserum against *Mycoplasma hyopneumoniae by an efficient absorption method* 155

No. 3

Announcement iii

Research Articles
C.B. Chidambara Raj (USA)
Protein purification by counteracting chromatographic electrophoresis: quantitative focusing limits and protein selection at the interface 161

A.J. Winder (UK)
A stopped spectrophotometric assay for the dopa oxidase activity of tyrosinase 173

C. Mischiati, D. Fiorentino, G. Feriotto, N. Bianchi and R. Gambari (Italy)
A chromatographic procedure for fully automated isolation of DNA from human whole blood 185

G.P. Perletti (Italy)
Partial purification of protein kinase C isoenzymes from rat liver 195

M.L. Di Paolo, M. Scarpa and A. Rigo (Italy)
A sensitive spectrophotometry-based method for the determination of the rate of hydrogen peroxide generation in biological systems 205

M.M. Pichare and M.S. Kachole (India)
Detection of electrophoretically separated protease inhibitors using X-ray film 215

R.G. Johnston, W.K. Grace, C.L. Lemanski and A.R. Mallawaaratchy (USA)
Real-time detection of DNA during gel electrophoresis using a Zeeman refractive index detector 225

Short Notes
M.V. Nesterenko, M. Tilley and S.J. Upton (USA)
A simple modification of Blum's silver stain method allows for 30 minute detection of proteins in polyacrylamide gels 239

T.K.S. Kumar, V.V.H. Prasad and M.W. Pandit (India)
Origin of multiple bands of proteins on sodium dodecyl sulphate-polyacrylamide gel electrophoresis – intermolecular disulphide cross-linking due to the presence of oxidizing components in the reducing agent 243

Corrigendum 249

No. 4

J. Wang, F. Reitz, T. Donaldson and L. Pagliaro (USA)
A computer-interfaced falling ball viscometer 251

D. Moe, C. Garbarsch and S. Kirkeby (Denmark)
The protein effect on determination of DNA with Hoechst 33258 263

G. Lewin and I. Popov (Germany)
Photochemiluminescent detection of antiradical activity; III: a simple assay of ascorbate in blood plasma 277

S. Bourgerie, S. Berger, G. Strecker, R. Julien and Y. Karamanos (France)
A fluorescence high-performance liquid chromatography assay for enzymes acting on the di-*N*-acetylchitobiosyl part of asparagine-linked glycans 283

A.H. Johnsen and A. Kastrup (Denmark)
Characterization of antibodies using N-terminally truncated peptides produced in an automatic protein sequencer 295

C. Burgtorf and H. Bünemann (Germany, UK)
Representative and efficient cloning of satellite DNAs based on PFGE pre-fractionation of restriction digests of genomic DNA 301

K. Takagaki, Y. Takeda, T. Nakamura, K. Daidouji, H. Narita and M. Endo (Japan)
Analysis of glycosaminoglycans by high-performance liquid chromatography 313

J. Mohammad and S. Hjertén (Sweden)
A simple and inexpensive chromatographic method for the purification of γ-globulin from human serum 321
